Dear Sport friends

The Nordic Disciplines in Skiing are very popular sports in Sweden, and they have high participation by men and women in major parts of our country, on exercise and professional levels.

The Swedish Sport Confederation (SSC) gather 72 sport associations, and work for a safe sport where everyone feels welcome and can develop according to their own conditions. SSC are also engaged in developing accessible facilities and sports environments, a sport free from crime and cheating and international sustainable events and meetings in Sweden.

A Nordic World Ski Championships in Falun 2027 would be a great possibility to once again contributed towards a continuing high interest for the sport on a regional, national and international level. A Nordic World Ski Championship in Sweden in an opportunity to inspire more people to an active lifestyle, as well as inspiring next generation of skiers to aim for higher goals and achievements – reaching your highest potential.

SSC fully support the candidature of the Swedish Ski Association and host city Falun, to host the FIS Nordic World Ski Championships in 2027. If Sweden is entrusted to host the Championship, I am convinced that all functions will be carried out in the best possible manner. It is with pleasure I wish all friends of the International Skiing Community a warm welcome to Sweden.

Stockholm
SWEDISH SPORTS CONFEDERATION
